Coronation Day Depends on The Amount of Funds

Cannot Complete Program Till All Funds Are In

Very little progress has been made during the past week in connection with the arranging for the coronation celebration program to be arranged for next month.

Although the several committees are making plans for the day's program nothing definite can be arranged until the cash donations have been completed. The finance committee is anxious to have all those who intend to contribute, to do so as soon as possible. Any amount will be gratefully received. Their donations may be made to any member of the finance committee: Messrs J R MacKenzie, K Johnson, W Hill, Dr Watson, at any of the stores in town where lists are available.

As a large part of the funds will be used for the entertainment, refreshment, prizes and souvenirs for the school children, it is hoped the committee will not be disappointed in the carrying out of the proposed plans. Any funds which may be left over will be used for useful purposes locally.

Funds acknowledged last week

Previous Donations	\$178.00
Mr R Pederson	1.00
Mrs R Pederson	1.00
Mr F Conger	1.00
Mr W H Nussey	1.00
Public School Fund	5.00
Teaching Staff	8.00

"Mutiny on the Budget" would be a good title of a play for Chas. Lauson to put on the screen to draw a crowd in Alta

Mr Myron H Davis, of the Glass Factory staff, was united in marriage last Saturday to Miss Olive F Lund of Medicine Hat. The young couple will reside in Redcliff.

Rev H S Hammett left last Monday on a business trip to Windsor Ont. where he will spend a few weeks. Services will be conducted here by Canon Lyke Parker of Regina.

Report on Alberta's financial situation as seen by the Bank of Canada as a result of a survey on behalf of the Dominion Government will be ready for release within 10 days or two weeks, it was stated by Graham Towers, governor of the Bank of Canada.

Rev H V Ellison minister of Gordon Memorial commenced a series of sermons last Sunday morning on the subject "Questions Men are Asking." Such subjects as "Of what use is Religion?" "Can we know God?" "Can we rely on belief in an after life and other vital questions will be dealt with.

FOR SALE—A number of good storm windows, suitable for use in verandahs or for extra doors. Sizes 63 ft., with 12 panes of glass each. Apply at The Redcliff Hotel.

On Sing Passed Away Last Tuesday

Was Pioneer Restaurant Proprietor of This Town

It was a great shock to the citizens of Redcliff to learn of the sudden death of On Sing, proprietor of the Club Cafe, who passed away Tuesday night at 11 o'clock.

Deceased had only been ill for a few days suffering from a severe attack of heart trouble. On Sing was one of the pioneers of Redcliff, having arrived here shortly after the town was incorporated. He came here as a private cook for Mr Danils who was then Mayor of the town. Later he opened up a restaurant and grocery store for himself and has conducted it successfully ever since.

Deceased was a real gentleman and a good business man who kept his premises in a clean, tidy condition and was most courteous and accommodating to his customers.

Deceased was born in Canton, China, 67 years ago. He leaves a wife, a son and a daughter who still reside in Canton.

On Sing will be sorely missed by his many staunch friends in Redcliff and district.

An up to date airport with hangars, meteorological and radio stations etc to be erected in Lethbridge at a cost of \$125,000.

Amendments to the Vehicle and Highways Act now compiled motorists who approach each other on the highways at night to dim their headlights within 850 feet of one another.

Seed Grain Loans From Federal Govt.

Will Grant \$8,850,000 To The Prairie Provinces

Seed grain loans to a maximum of \$8,850,000 for farmers in the prairie provinces will be guaranteed by the Dominion government under a bill of which Finance Minister Duggan gave notice in the house of commons. Such loans are divided as follows: Alberta \$1,600,000, Manitoba \$750,000, Saskatchewan \$6,600,000. The loans will be made by chartered banks and guaranteed by the provinces.

Canadian Air Service Expected by Sept.

Predicted Travel From Halifax to Vancouver in 21 Hours

Trans-Canada air service by next September, linking Halifax and Vancouver on a 21-hour schedule with a six-cent-a-mile fare, was held out to the house of commons by Hon C D Howe, minister of transport. He said after a 48-hour service London to Vancouver would be possible. The minister said Canadian Airlines would be able to travel between Montreal and Vancouver on a 6-hour schedule, leaving Montreal in the evening and arriving in the west coast at 11 o'clock the next day.

Prosperity Doubts Abandoned

The Alberta government's prosperity certificate plan, launched in September, 1936, has been abandoned, provincial treasurer Low announced yesterday.

Investigation Shows Alberta is in Good Shape

Says Alberta Does Not Need Financial Assistance

The report from the Bank of Canada after investigating Alberta's condition, was tabled in the federal house yesterday. The report stated that Alberta does not require temporary financial assistance from the Dominion government.

The bank found that Alberta can maintain its government services on as favorable a basis as Manitoba or Saskatchewan without receipt of additional assistance and we therefore see no reason for recommending that temporary financial aid should be extended by the Dominion government.

The bank investigated Alberta's financial position at the request of Premier Abernethy.

Mrs West, who has been ill for the past few weeks, is now gradually improving.

Mr Newton of Portland, Ia at present visiting his daughter Mrs A R Ballantyne and Mr Ballantyne.

Ice on the river south of town is moving out rapidly on account of the springlike weather during the past week.

Don't overlook the smoker to be held in the Legion club room Friday night of this week. A good program has been arranged for the occasion.

Wheat Prophecy Has Been a Failure

Prediction Made Years Ago As Now All Wrong

Thirty three years ago a British Scientist predicted that there would be a world famine. He based his calculations on the probable population increase and the limit of possible production of wheat and other food. The year 1932 saw the world glutted with wheat and prices at the lowest level in recorded history.

Then Hon J H Thomas, Lord Privy Seal in the British government, ventured the prophecy that wheat prices would never touch \$1.00 a bushel again.

These illustrations show the ability of prophesying when it comes to wheat.

Right now the wheat picture is promising for wheat exporting nations. Price are high and trade has been averaging better than 50 million bushels a month the previous year.

The exports of Canadian wheat and wheat flour from August last, 1936 to March 1937 totalled 150,463,921 bushels, an increase of 10,015,911 bushels or 7.1 per cent over the previous year.

Adequate supplies of wheat and barley for seedling purposes are in storage in Alberta and as soon as the federal government arrange the necessary guarantee, delivery will be made to farmers without delay, H. A. Watt, minister of agriculture, stated today.

THE KING TO BROADCAST AFTER THE CORONATION

The British Broadcasting Corporation announces the prime ministers of the Dominions will broadcast messages to the Empire after the King has spoken following the coronation. His Majesty will speak at 7:20 p.m. G.M.T. (12:20 p.m. M.S.T.) from a special microphone in Buckingham Palace. It will be the first occasion on which a king has spoken by radio to his subjects after his coronation.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Redcliff

Assessment R. 11 1937

Notice is hereby given that the assessment roll of the Town of Redcliff for the year 1937 has been prepared and is now open for inspection at the office of the secretary-treasurer from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer. Dated the 8th day of April 1937

F V Britt
Secretary-Treasurer

S. C. Insurgents Moved to Oust Premier, Cabinet

Speaker Rules That Motion Is Unconstitutional

In the local legislature yesterday a resolution was moved by S A G Barnes, S C member for Edmonton, and seconded by W J Lampley, S C member for Peace River, that this assembly do now declare all cabinet offices, including the office of the premier, vacant, and that we forthwith proceed to elect a premier and also the members of the cabinet by a majority vote of this assembly.

The mover declared: "This government has admitted its own inability to take the first steps to introduce the principles of Social Credit in Alberta."

After the motion was made Hon Peter Dawson, speaker of the House, ruled that the motion will not be allowed in the order paper of the Legislative Assembly as he claimed it was unconstitutional.

Eight steamships have been chartered to transport the British contingent of 8,000 Boy Scouts and leaders across the Channel to the World Scout Jamboree in Holland this year.

Look out for the big carnival to be held in Broadway Building on Friday April 30th. Cake baking contest, good prizes, our surplus of St Andrews S & W A. Watch for further particulars.

Social Credit members of the legislature last week-end approved Premier Abernethy's suggestion that the members pay should be increased to \$2,000 a year. It is quite evident that the members are firm believers that Alberta is living in the midst of plenty.

A special Boy Scout and Girl Guide Thanksgiving Service in Westminster Abbey on the afternoon of Saturday May 22nd will be attended by 6,000 boys and girls. The gathering will include Scouts and Guides from overseas, in London for the coronation.

Plans to present a petition of non-confidence to Premier Wm. Abernethy appear to have collapsed. It was learned authoritatively that two signatures of house members attached supporters of the petition were reported withdrawing it from circulation.

"Silent Barriers" is Splendid Canadian Film

"Silent Barriers," the film epic of the construction of the Canadian Pacific Railway, which had its Empire premiere under the patronage of Her Majesty Queen Mary and Mrs. Stanley Baldwin, in London recently, and its Canadian premiere in Montreal, and which depicts one of the most important chapters in the history of the British Commonwealth of Nations, will be shown in lecture form from coast to coast during the current month. The story, based on Alan Sullivan's book "The Great Divide," brings back and vivifies the fierce struggle with nature waged by the giants of pioneer railroading in this country, and particularly the seemingly impossible task of thrusting the road through the Rocky Mountains barrier. The story has a tremendous Canadian

historical value, as well as being first rate entertainment. The film, a Canadian production, was made at Banff, B.C., and in the surrounding mountain area. It includes such great stars as Richard Arlen, Barry Mackay, Anastasia Geller, Lilli Palmer, and J. Farrell MacDonald. In it the men who would not acknowledge defeat in the face of their task are shown in a way that is both dramatic and inspiring.

TANKER RANCHED BY LIVER IN FOG

Many Canadian Pilots are Now Serving On Royal Canadian Air Force

Britain's preparedness program has led to an enrolment of nearly 150 pilots, holding civil flying licenses, in Canada to service on short notice.

Five commissions in the Royal Air Force, government officials said.

It was emphasized the movement was not organized by government agencies but was voluntary on the part of the pilots who found the R.A.F. willing to accept their services. The pilots were generally young men attached to Canadian flying clubs.

Commenting on Sir Philip Sassoon's statement in the British House of Commons, inviting Canada to co-operate in supplying pilots, defence department officials stated the government had done so, recruiting for the R.A.F. as far as a few pilots from the Royal Canadian Air Force had been sent to England for special courses of instruction.

Officials refused to state whether any preparations were under way to send a number of R.C.A.F. pilots to England as suggested by Sir Philip.

At present there are 152 officers of the R.C.A.F. of which 128 are on the general list and are active flyers. These pilots are scattered across the Dominion at the various flying schools.

Information concerning aircraft and pilots has been passed on to the British air ministry, which stated it was stated that a number of the civil 150 pilots now in England with the R.A.F. had been medically examined by the military department here before they sailed.

During the past few years, a few pilots had left Canada to join the R.A.F., but the number increased rapidly following Britain's declaration of war. It was now necessary to recruit and it has now nearly reached the 150 mark.

Some months ago it was announced there are several R.A.F. pilots in Canada taking special courses and one R.A.F. pilot, stationed here for cold weather flying. But the reciprocal exchange of pilots between the two countries is not believed to be large.

A National Pastime

Collecting Cheap Things is Becoming Quite A Hobby

Collecting things, just as a much larger accumulator stamps, or marbles only on a small grand scale, is becoming an American national pastime with many thousands of persons spending hours in search of rare hitting pots, antique music boxes, Indian arrow-heads and what not, states the Christian Science Monitor.

The growth of collecting as a hobby is reported by Mr. O. C. Lightner, who for three years has published a magazine called "Hobbies." He has observed as in the case of this trend the springing up of hobby shops in many cities, little stores containing all kinds of objects ranging from buttons to firearms, which may be snatched up as prizes by collectors.

Most collectors start in an amateurish way and develop into specialists, said Mr. Lightner. Take the stamp collector, for example. The experienced ones limit their field. A woman in New York collects only lavender stamps. A man philatelist is interested only in those bearing the picture of Columbus. Others go in for animal stamps, stamps bearing pictures of ships, and so on.

Stamp collectors form the largest group, the hobby editor said. Next he placed the coin people or numismatists. After them come the antique fans, and then probably the collectors of Indian relics.

Related Vegetables

"He was phantasmic and carried a large assortment of golf clubs."

"Yes," he said to the girl in the train. "I've had an awful day. Rained all the morning, and by lunch time the greens were in a shocking state."

"Really?" said the girl. "We had asparagus, but that wasn't very good, either."

Coronation Fish

Coronation fish in patriotic red, white and blue are a popular item in London shops just now. The dish, from South America, has red tails, white stomachs and brilliant blue backs. Zoologists have been working on the fish-changin creature, "Neon Tetras," but in corotation and Enders, that doesn't mean a thing.

Barker—"This is the fourth time you have had this note removed."

Post—"Type, sir! I feel that note is the only immortal thing I shall ever write!"

Developing Volcanic Ash

New Industry For Saskatchewan

May Result From Research

Research on deposits of basaltic and volcanic ash in western Canada may lead to their development for domestic use, the Canadian Institute of Mining and Metallurgy was told at its annual meeting in Montreal.

Prof. W. G. Worrester of the University of Saskatchewan and the National Research Council, has already made progress in improving the bleaching qualities of these clays of treating them with acid, it is reported.

The clays are used in the oil and lead industry for purifying and de-colorizing oils, gasoline and fats. Formerly Canadian manufacturers depended on imported clays.

Deposits of volcanic sand in Saskatchewan are already being used for cleaning and scouring compounds.

New methods for extraction of metals from ores have been developed due to the demands of industry for metals of the highest purity, according to a paper to be read by Prof. J. U. McEwen.

Producers are meeting the demand for many per cent pure metals largely by electrolytic refining, the paper says. By this method valuable metal by-products are being recovered.

Canada has recently become an important source of many rare metals, selenium and tellurium due to electrolytic refining. The metals are refined in imported oil. In older methods of treating ore.

Radium produced in Canada is exceptionally free from monochlorine. Other impurities, Dr. McEwen said, are negligible. A duchois may spend \$2,000 for the one unit and it can only be used for corollary ceremonies.

The Sea Of Life

Is Well Approached On Our Journey Through This World

The people who first used the term "the sea of life" drew a most apt metaphor. From the time a person is born, there is something in his life that smacks of the mighty deep.

The stage of infant squalls over the little diver gets him up and under him and prepares to learn to sail his own particular little fleet through the sea. He is held a review he would probably describe his armada contains the S.S. Friendship, the S.S. Happiness, the S.S. Love, the S.S. Hardship that tags along the ship with her cargo of spite.

And if the little shipper learns to put into the harbor of sound thoughts he will avoid the gales that make his passage in eternity leading hazardous. St. Thomas Journal.

Work To Be Done

Training Young People To Take Places Of Older Men

The following is taken from Shilling Lines, Lintyne News: One large California employer told Jack Deane, the Peace publisher, about his inability to get satisfactory help.

"The trouble," he said, "is that for five years we have all been working with skeleton organizations, and we have not been building men to fit our needs. We must start all over again, building men."

Every employer should keep before him that oft-quoted sentence from Emerson's essays: "The greatest secret in the world for splendor, for extent, is the upbringing of a man." All of us must interest ourselves in the proper training of young people who will take the place of those who are retiring to-day.

A 75-year-old grandfather's clock made in London and going strong and correct has been presented to the New York Academy of Medicine, with a \$100 reward fund to keep it wound and in repair.

The gorilla beats his breast as an outlet of a superabundance of energy and does it during all his various moods, not only when he is angry.

A writer declares that the future of middle-class family life is in the hands of domestic servants. They will probably let the whole thing drop.

The tanker Frank H. Buck

This dramatic photograph of the stricken tanker, Frank H. Buck, was taken a few moments after she had been rammed in a fog off San Francisco by the liner President Coolidge. Although the tanker was badly damaged it remained afloat and was towed to port after its crew of 38 had been saved. The liner, carrying 1,300 passengers, was forced to turn back for repairs.

Robes are Costly

Costumes For Coronation As Expensive As They Are Magnificent

Dresses, gowns and robes for the coronation service in Westminster Abbey are as expensive as they are magnificent. A duchess may spend \$2,000 for the one outfit and it can only be used for coronation ceremonies.

A peruse of the baroness degree has to have to pay more than \$500 and the cost mounts as the owner scales the social ladder. Nor do these figures include such extras as jewels and as these include tiaras, necklaces, clips, brooches and pins, they represent a tidy sum.

Robes for the coronation must be of crimson velvet or of purple velvet if the wearers are of blood royal. The court gowns worn under must be white, cream, or silver. However, for those less favorably situated, there are such made-goods as machine-made velvet, which is considerably cheaper, and rabbit not infrequently passes for ermine.

The robe consists of three separate parts, the velvet kirtle or gown, opening in front to show a court dress beneath, the train also of velvet falling from the shoulders, and over that a short ermine cape. A duchess does not pay more and because she is a duchess, but because her robe has a longer train and a wider ermine trimming.

Rich patchwork of ancient Rome planted fruit trees on the summits of high fens and housewife, thinking that this enabled them to live under the protection of the gods who watched over orchards.

In the middle ages, Italy was the greatest resort for students desiring higher education.

Hearts are Trumps in Jiffy Knit

PATTERN 5012

Like to be "Queen of Hearts"? This amusing blouse of all-over heart design and fashionably full sleeves, is a charmer, and no end of fun to knit. The speed hearts are simply openwork stitches outlined with blanket stitch of contrasting color. Pattern is the new "Tyrone" blouse. As a play-lace, add heart-shaped buttons and buckle. Work with silk or matching plain knit in size 10 to 18 and 20 to 42, an illustration of it and of the stitches used, material required and other details.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winning Newspaper Union, 175 McMillan Ave., Winnipeg.

There is no Alice Brooks pattern book published

Future Of Great Northern Areas Of Canada Lies In Development Of Minerals

Out Varieties

New Highly Rust Resistant Out Product At Dominion Laboratory

At Winnipeg

In Western Canada Victory and Banner have long been the leading varieties of wheat. The new, however, for earlier maturing varieties as well as rust resistant types has resulted during the past few years in the appearance of several new introductions. The most important of the early maturing varieties are Ophir, White Crow and Legacy.

Of the three, Ophir is perhaps the most widely adapted. Compared with Victory or Banner it is seven to ten days earlier maturing, produces a stiffer but shorter straw and yields slightly less. The bushel weight is high and the quality excellent. Ophir is recommended as an early cut in all three prairie provinces.

White Crow, which originated at the Wascana Agricultural Experiment Station, matures only a day or two later than Ophir. This variety has fair yielding capacity but may be criticized for its slowness of harvest and low bushel weight. It has the best performance in northern Alberta.

Legacy was developed at the Central Experimental Farm, Ottawa, and matures midway between Victory and Ophir. It appears to be adapted to central parts of Alberta and Saskatchewan where it produces a high yield of somewhat slender grain of good quality. At the Dominion Experimental Farm, Ottawa, and in the latter in bushel weight. The recent introduction from Minnesota, a popular in parts of Manitoba on account of its resistance to rust, it resembles Victory very closely in earliness of maturity, straw strength and kernel characteristics. Legacy yields somewhat less than Banner or Victory under drought conditions and distinctly better in rust years.

Two other rust resistant varieties of American origin, Minerva and Rueda, have been tested at Brandon. They have proved to be of poor quality, particularly the former which possesses objectionable yellow kernels.

Vanguard is a new highly rust resistant out produced at the Dominion Test Laboratory, Winnipeg, and shortly to be released for distribution. Results from recent co-operation tests show it to be two days earlier maturing than Banner, stiffer strawed and approximately equal in bushel weight and yielding capacity.

Quality of grain is a source of problems of distance and communication.

The McIntosh Red

Famous Variety Of Apples Had Its Birth In Eastern Canada

The facts of the case are that a certain John McIntosh, who came to Canada in 1821, brought a farm seedling of the McIntosh variety of apples to Canada in 1823, and at Golden Lake in 1824. McIntosh and lead seed deposits have been found since, and some development work has been carried out. Lignite coal has been discovered in several places.

While he was making a clearance on his new property, he discovered a few wild apple trees which were carefully tended by his son, Allen, who propagated and developed the species now known as the McIntosh. The McIntosh variety was introduced to Canada in 1824.

After the snowfalling, incident the boy was sent to his room by the landowner. Instead he went home, and returned with his father. Father, it was alleged, fought at the house, and the boy was sent to his room by the landowner. Instead he went home, and returned with his father. Father, it was alleged, fought at the house, and the boy was sent to his room by the landowner. Instead he went home, and returned with his father.

Father was summoned under the 136 act for conduct likely to cause a breach of the peace. The case was dismissed, but father was warned not to interfere with school duties.

Nothing To Worry About

The conductor of a very slow King-lit train, hurried along the platform and opened the door of a compartment occupied by an elderly gentleman.

"Pardon me, sir," he said, "but I've got some very bad news for you."

"Oh," exclaimed the passenger. "What's happened?"

The conductor looked apologetic. "Well, sir," he said, "we've just had news to the effect that Davidson, the shop where you were getting off, has been burned to the ground."

"That's all right," returned the passenger; "they will have rebuilt it by the time this train gets there."

Stretching from Hudson Bay

to the eastern boundaries of the province of Manitoba, Saskatchewan, Alberta and British Columbia to the North Pole, the Northwest Territories occupy 1,000,000 square miles, or more than two-fifths of the area of the Dominion. Although about one-third the area of Europe, the population is only 15,000, including Indians and Eskimos.

In spite of the northern latitude the Territories are not a region of perpetual ice and snow as many believe. Although the winters are long and cold the temperatures are quite high in summer. The long days of sunlight promote rapid growth of vegetation, so that in some places grasses and vegetables are grown for local consumption even as far north as the Arctic Circle. The so-called barren lands are not infrequently well covered with flowers and mosses. The northern limit of timber growth runs in a sweeping diagonal line from the mouth of the Mackenzie River to Churchill on Hudson Bay, and timber grows in great quantities on the shores of Great Bear Lake.

Since the seventeenth century the Northwest Territories have been an important source of furs and since 1922 have yielded a far harvest valued at more than \$27,000,000.

The importance of the fur industry to the economic life of the Territories, recent events have shown. The discovery of the great northern area lies in the development of its mineral resources. The discovery of the Yukon in 1896, and since then the Yukon has produced gold to the value of more than \$192,000,000.

In the Northwest Territories the most important mineral development prior to 1920 was the bringing into production of the first diamonds in the Dominion. The diamonds of the Mackenzie River, about 875 miles north of Edmonton. The discovery attracted considerable attention, but the veins revealed opened until 1922, when a market for the oil was found in the Great Bear Lake mining field, where pitchblende deposits, from which uranium is obtained, were discovered in 1920. The Great Bear Lake development has been of importance not only because of the uranium deposits, but because of the inspiration it has given to prospecting and mining in the Territories. The discovery has given to prospecting and mining in the Territories. The discovery has given to prospecting and mining in the Territories.

It is not until now that it is possible in a region that, prior to 1920, was doubtfully regarded as a profitless wilderness, to solve a series of problems of distance and communication.

Following the discovery of the Great Bear mining field, free gold was found near the mouth of the Mackenzie River in 1924. A number of other promising discoveries have been made, including those at Oulashan Lake in 1924, at Golden Lake in 1924, McIntosh and lead seed deposits have been found since, and some development work has been carried out. Lignite coal has been discovered in several places.

Lignite coal has been discovered in several places.

Following the discovery of the Great Bear mining field, free gold was found near the mouth of the Mackenzie River in 1924. A number of other promising discoveries have been made, including those at Oulashan Lake in 1924, at Golden Lake in 1924, McIntosh and lead seed deposits have been found since, and some development work has been carried out. Lignite coal has been discovered in several places.
